

## TECHNICAL DATA SHEET

### Tackers & Accessories Description and Advantages

#### Insulation Tacker (stock)

Tacker for fitting hooks and washers onto insulation mats

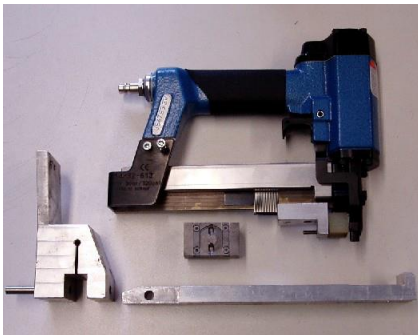

- Quick, easy and economical
- Sturdy, durable design
- Quilting tacker also available

A pneumatic operated staple gun (6 bar) with specially designed facilitate the fitting of lacing hooks and washers onto insulation mats.

Operation: the washer is placed on the special template; the hook is then slotted into the hook-holder and in one movement the hook and washer are stapled onto the insulation mattress, simply by pushing down and pulling the trigger.

fixtures to

#### Quilting Tacker

Quilting Tacker is a machine that makes it possible to shoot staples into the surface of the insulation mattress thus forming "quilts" to hold the insulation in place.

The Quilting Tacker is a permanently-mounted pneumatically-operated machine.

By positioning the mattress under the Tacker and pushing down the foot pedal, the Quilting Tacker is lowered onto the mattress and a staple is shot into place either with or without lacing washer.

#### Staples

Description: Staples for fixing hooks and washers onto the mattresses.
